

iphone applications for oscommerce

For all you iphone users there are now a range of applications that will allow you to manage your shop from the comfort of your iphone. All the applications are based on the updating orders and viewing sales reports. Very handy for those on holidays looking to keep an eye on their business while they are away without having to lug about a laptop and look for a internet connection on a campsite! The availability of these applications to plug into open source ecommerce further under pins the fact that open source ecommerce is here to stay. The more technologies who plug into oscommerce the better.
