

## Dreamweaver - Basic Training Course

Dreamweaver is a popular cross-platform Web authoring and site management program that you can use to create and maintain your Web pages without manually coding HTML. Learn how quick and easy it is to control the appearance of your Web page. Topics include:

- Overview of the Dreamweaver workspace and shortcuts
- Add content and preview your page
- Create e-mail, external and internal Web page links
- Format text using headings, lists, and styles
- Set Web page properties and check spelling
- Add images and create a table

Duration: 1 day
